The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 27 is rejected under 35 U.S.C. 102(b) as being anticipated by Harris.

In particular, Figure 4 of Harris teaches a seal (94) which is biased closed to seal inlet (92) (which is annular and has two seats). Since the seal is elastic and flexes to open the inlet it has to be biased closed, albeit a somewhat light bias.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 27 is rejected under 35 U.S.C. 102(b) as being anticipated by Beakley.

In particular, Figure 4 and the description at column 4, line 54 – column 5, line 2, describes a seal which is weighted (by its own weight) and therefore biased closed to seal an inner and an outer seat of the pump fuel inlet (70).

Claims 28-31 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 1-26 and 32-36 are allowed.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
